Career Objective

Enthusiastic and detail-oriented aspiring developer and data analyst with hands-on experience in Android development, Java, PostgreSQL, Python, Power BI, and data analytics. Skilled in building applications, analyzing datasets, and creating interactive dashboards. Quick learner with strong problem-solving abilities, committed to delivering efficient, data-driven, and innovative solutions.

Education

- **Nadimpalli Satyanarayana Raju Institute of Technology Bachelor Of Technology (B-Tech) in Computer Science and Design 2023 - 2027**
Dedicated and detail-oriented B.Tech student in Computer Science and Design with a CGPA of 7.43, strong analytical skills, and practical project experience. Seeking a challenging role to leverage technical expertise and deliver impactful solutions.

Technical Skills

- **Programming:** Python , HTML
- **DataBase:** SQL , RDBMS
- **Data Skills:**
- **Tools:** Power BI , Microsoft World , Microsoft Excel , Microsoft Powerpoint
- **Operating Systems:**

Experience

- **Android Developer Virtual Internship**
 - Completed a virtual Android Developer internship, building mobile applications using Java/Kotlin in Android Studio. Designed user-friendly interfaces, integrated APIs, and managed data storage. Collaborated on debugging and testing while gaining hands-on experience in the full mobile app development lifecycle.
- **Data Analytics with Python & Power BI**
 - Completed a virtual internship in Data Analytics using Python and Power BI.
 - Analyzed datasets, performed data cleaning, and created interactive dashboards.
 - Gained experience in data visualization, statistical analysis, and deriving insights to support data-driven decision-making in real-world scenarios.

Certificates

- **RDBMS PostgreSQL Training**
 - Completed PostgreSQL training, gaining hands-on experience in SQL queries, database design, data modeling, and transaction management, developing practical skills in creating, managing, and optimizing relational databases efficiently.
- **JAVA Training At IIT Bombay**
 - Completed Java training at IIT Bombay, learning core Java, object-oriented programming, exception handling, and multithreading, with practical experience in building console and GUI-based applications
- **Digital Edge 101**
 - Completed Digital Edge 101 training, gaining foundational knowledge in digital technologies, online tools, and digital literacy. Learned essential skills for effective communication, productivity, and navigating the modern digital en
